Earthquake Rehabilitation Project

The magnitude of earthquake was 7.7

Over 40,000 houses were destroyed in Awaran region

Awaran is located in a remote mountainous range

URC has initiated an earthquake rehabilitation and reconstruction project in Awaran district in 2013

1500 families were supported to rebuild their house in various remote vilaaages

The Project targeted to support 1500 families to construct their traditional village houses

The support recived from ACHR, SELAVIP and MISEREOR

Mostly families live in mud houses

The distribution process of roofing materials for shelter was a community led process, this includes the following steps:

- Survey / Visit
- Selection of villages for support by community activists
- Selection and preparing list of families through a community based committee
- Mobilization of the families to start construction work through community activists
- Provision roofing materials and erection of roofs
- Monitoring of construction work by a joint team of community activists and project team
- Final documentation of houses by the joint team
- Completion report by a joint team of community activists and project team

Project supports the communities to get roofing material

Poor families are unable to arrange proper roofing materials

Erection of proper roof tops will save poor families from rains and harsh weathers

Progress of the project: Construction of 50 houses is going on

Roofing Material

- Bamboos thick
- Bamboos thin
- Steel Beams
- Plastic Sheets
- Mats
- Palm Leaves
- Rope /binders

This is a community led project
A village committee
select the most deserving
families for the support.

URC assist the village
committee survey and
supervision of the
construction work.

Thank you
